

AULA 08 - Vídeo 4

Introdução

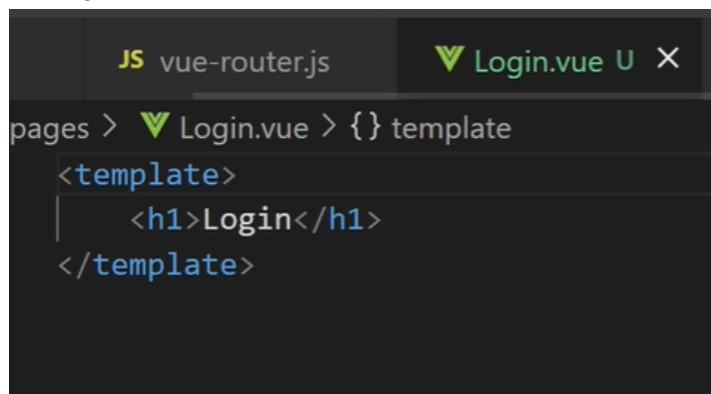

Nesta aula produziremos as nossas telas criadas agora no código

Criaremos as telas na pasta pages..

Antes disso vamos criar e continuar numa nova branch desta aula 'passo-3'

Em login.vue

```
JS vue-router.js  Login.vue U  JS index.js  X
> routes > JS index.js > ...
You, há 1 segundo | 1 author (You)
1 import Home from '../pages/Home.vue'
2 import Perfil from '../pages/Perfil.vue'
3 import Login from '../pages/Login.vue'
4
5 export default [
6   { path: '/', component: Home },
7   { path: '/perfil', component: Perfil },
8   { path: '/login', component: Login }
9 ]
```

para testar na url abrindo o servidor coloque final /login

Faremos o '/' ser o login

```
import Home from '../pages/Home.vue'
import Perfil from '../pages/Perfil.vue'
import Login from '../pages/Login.vue'

export default [
  { path: '/', component: Login},
  { path: '/home', component: Home},
  { path: '/perfil', component: Perfil},
]
```

Em App.vue

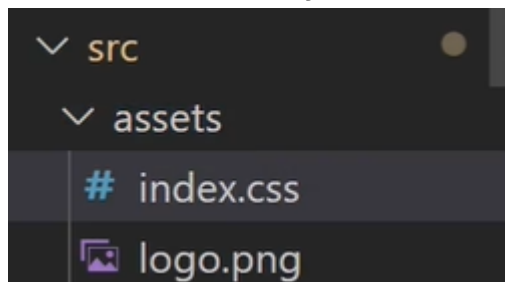

```
<template>
  <nav>
    <router-link to='/home'>Home</router-link> |
    <router-link to='/perfil'>Perfil</router-link>
  </nav>
  <RouterView></RouterView>
</template>
```

Agora:

em Login.vue

```
<template>
  <h1>login</h1>
  <form action="">
    <input type="email" placeholder="Email">
    <input type="password" placeholder="Senha">
  </form>
</template>
```

Criaremos uma estilização base na pasta assets que ficam os recursos:

importamos ele no 'index.html'

```
<link rel="stylesheet" href="./src/assets/index.css">
```

Em 'app.vue' retiraremos a estilização e colocaremos no nosso 'index.css'

```
#app {
  font-family: Avenir, Helvetica, Arial, sans-serif;
  -webkit-font-smoothing: antialiased;
  -moz-osx-font-smoothing: grayscale;
  text-align: center;
  color: #2c3e50;
  margin-top: 60px;
}
```

Agora em index.css

```
body{
  background-color: #f5f5f5;
}
#app {
  font-family: Avenir, Helvetica, Arial, sans-serif;
  -webkit-font-smoothing: antialiased;
  -moz-osx-font-smoothing: grayscale;
  color: #2c3e50;
  margin-top: 60px;
  margin-left: 60px;
  margin-right: 60px;
}
```

```
input{
  color: #2c3e50;
  height: 30px;
  border:none ;
  border-bottom: solid 1px #2c3e50;
  border-radius: 5px;
  padding:0px 10px ;
}
button{
  background-color: #2c3e50;
  height: 40px;
  border:none ;
  border-radius: 5px;
  padding:0px 20px ;
  color: white;
  font-weight: 600;
  text-transform: uppercase;
}
.form-login{
  background-color: white;
  width: 300px;
  margin: auto;
  padding:40px 60px;
  border-radius: 5px;
  box-shadow: 1px 1px 8px -2px rgba(0, 0, 0, 0.2);
  display: flex;
  flex-wrap: wrap;
}
.form-login input{
  width: 100%;
  margin-bottom:30px;
}
.form-login button{
  width: 100%;
}
.text-center{
  text-align: center;
}
.title{
  font-size: 40px;
  text-transform: uppercase;
}
```

'Login.vue'

```
<template>
  <h1 class="text-center title">login</h1>
  <form class="form-login">
    <input type="email" placeholder="Email">
    <input type="password" placeholder="Senha">
    <button>Entrar</button>
  </form>
</template>
```
